TERMS AND CONDITIONS OF SALE

TERMS OF PAYMENT:

1. **Cash Plan.** Whereby we book the order, reserve the stock, notifying you a few days prior to shipping time when remittance can be sent and shipment will be forwarded promptly. This cash plan earns 3% discount and free boxing. This is equivalent to between 6 and 8% profit on the goods before you receive them.
2. **Partial Payment Plan.** Whereby 1/3 amount of order is remitted in advance and the balance goes forward freight or express C. O. D. payable at destination.
3. **Charge Account Plan.** Goods will be shipped on charge account only to customers of approved credit who supply satisfactory trade and bank reference allowing time for investigation. Fall shipments due December 1st. Spring shipments due June 1st.

CONDITIONS—We accept all orders upon condition that they shall be void should any injury befall stock from causes over which we have no control. At the moderate price at which we sell our goods we give no warranty except genuineness, expressed or implied, the purchaser assuming all risk and responsibility of the transportation, planting, growth and life of stock. Our responsibility ceases when goods are turned over to carriers. Prices do not include any guarantee as to growth.

BOXING AND PACKING—Boxing and packing will be charged for at actual cost of material used. We make no charge for delivery to the railroad station.

RATES—Five of same variety and size at the ten rate. Fifty of the same variety and size at the 100 rate. Five hundred of the same variety and size at the 1,000 rate.

PRICES—Are limited to Spring, 1923, and supercede all previous lists and ARE SUBJECT TO CHANGE WITHOUT NOTICE.

CLAIMS—For any cause will receive consideration only when made within 5 days after the arrival of goods.

SPECIAL NOTICE—Correspondents are requested to use their printed business letterheads. This list is for the trade only and in justice to our trade customers we use every possible effort to limit distribution of trade prices to those we know to be entitled to receive them. **USE PRINTED STATIONERY.**

LOCATION—We are situated in Northern Illinois, on well drained, rich, fertile soil, located forty-two miles northwest of Chicago. Visitors are always welcome. For complete directions for reaching Nursery see page 24.

STOCK GROWN ON CONTRACT—We are equipped to grow Evergreens and Deciduous Young Stock on contract for future delivery. Get our prices on anything you need. Our 65 years' experience will save you money.

NOTE:—Copy of our complete retail descriptive catalog of Evergreens will gladly be sent upon request. Illustrations and descriptions are accurate, authentic and true to life.

A Bird's Eye View of the Hill Nursery

It has been our steadfast purpose for over 65 years to continually select and seek out better, hardier types; and improve existing forms. There are in almost every instance, trees and shrubs of distinctly more desirable habits, outline, color or hardiness, for those who seek them out. In our search for seeds, which we assemble from the four corners of the earth, we are continually striving to obtain stocks that are better adapted to U. S. A. conditions. Through careful selection we constantly strive to improve the strains by reproducing only those truest to type. This is a service we are proud to offer to American Nurserymen who recognize the significance of this vital matter.

Variety	10	100	1000
Abies Balsamea (Balsam Fir)			
The characteristic odor of the Northern woods is chiefly, if not solely, due to this Fir. The foliage is very fragrant, young growth after being used for making the favorite "Balsam Pillows." Makes a handsome lawn specimen. Our stock is grown from a carefully selected strain of seed gathered in certain sections in Northern Canada, insuring hardiness and trueness to type.			
2-4 inch o 2 yr. From Seedling Beds.....	\$.....	\$ 4.00	\$ 30.00
4-6 " o 2 yr. " " " "		4.50	35.00
6-8 " x Once Transplanted—Bedded Stock.....		8.50	75.00

This form was discovered in 1866 by a nurseryman named John Wilcox, living near Omro, Wisconsin. Described by Prof. Sargent as an exceptionally beautiful and desirable Fir, having unusually long needles and retaining its lower branches with tenacity. Cones larger than the common form.

4-6 inch o 2 yr. From Seedling Beds.....	5.00	40.00
--	------	-------

Our plants are the type from Northern Colorado, the seed being collected in deep gorges of high altitudes where the blue and silvery foliage is characteristic, being compact and symmetrical in growth, with rather short needles, in contrast to Southern Colorado and New Mexico type which are of doubtful hardness, irregular and open growing. This tree was originally discovered by Archibald Menzies, 1792, and rediscovered by David Douglas, the eminent Scotch explorer in 1827, and introduced by him in the following year. It was shortly after named for him to commemorate his memory. A tree that is widely known and appreciated in both Europe and America.

6-8	inch	o	2 yr.	Seedling Beds	5.00	40.00
8-10	"	x	Once	Transplanted—Bedded Stock	10.00	90.00
10-12	"	xx	Twice	Transplanted—From Field Rows	3.00	25.00	225.00

Named after John Gould Veitch, an English Nurseryman, who discovered it in Japanese mountains in 1860. Bright green foliage, silvery white underneath. Of slender habit and average height.

4-6 inch x Once Transplanted—Bedded Stock	10.00	90.00
---	-------	-------

The value of our strain of Hemlocks is based on seed selection from Northern sources only, insuring hardiness and free, graceful, upright growth. In the past, European grown plants were mainly propagated from Southern collected seed (from the Carolinas, Tennessee, etc.), because the seed was cheap and easily obtainable. In addition to producing a rather inferior type of tree, when brought to colder climates, it always winter scalded, turned a ragged brown, or killed outright. Our Hemlocks are warranted the genuine Northern strain, and will be found superior to other offerings on the market.

8-10	inch x	Once Transplanted—Bedded Stock	12.00	110.00
10-12	" xx	Twice Transplanted—From Field Rows	2.25	20.00
12-18	" xx	" " " "	3.00	25.00
18-24	" xx	" " " "	4.00	35.00

We have been growing this variety successfully for many years. Our plants are propagated from seed obtained in Northern China, insuring the genuine pure strain, best adapted for planting in south-eastern, southern and Pacific Coast States.

6-8	inch	o 2 yr.	From Seedling Beds.....	3.00	20.00

Each x indicates one transplanting.

5 of same variety and size at 10 rate. 50 at 100 rate. 500 at 1,000 rate.

Variety	10	100	1000
Cupressus Glabra (Smooth Cypress) Closely allied to C. Arizona. The most distinctive characteristic of this tree is its thin, smooth, dark purple-red bark. Foliage is light blue-green.			
4-6 inch o 1 yr. From Seedling Beds.....	\$.....	\$5.00	\$40.00
Cupressus Lawsoniana (Lawson's Cypress) Tree reaching 200 feet with horizontally spreading and usually pendulous branches. Native Oregon to California. This is one of the most beautiful Conifers and very valuable, about sixty forms being cultivated.			
4-6 inch o 1 yr. From Seedling Beds.....	5.00	40.00
Cupressus Macrocarpa (Monterey Cypress) A rapid grower, forming a picturesque, broad, flat top crown. Also used for hedges.			
4-6 inch o 1 yr. From Seedling Beds.....	5.50	45.00
8-10 " x Once Transplanted—Bedded Stock.....	16.50
Cupressus Sempervirens Fastigiata (Italian Cypress) Our strain is from selected trees of extra compact, narrow habit.			
4-6 inch o 1 yr. From Seedling Beds.....	6.00	50.00
Gardenia Radicans (Dwarf Jasmine) Evergreen. Beautiful light colored pinnate foliage, very thrifty. Desirable for borders, beds and porch boxes. Can be trained as shrub or climber. The star-shaped, waxy-white fragrant flowers produced in abundance nearly all the year.			
2½ inch Pots 1 yr.....	20.00
Ginkgo Biloba (Maidenhair Tree) Popularly so named owing to its resemblance to the Maiden Hair Fern. One of the oldest trees in existence. Leaf bearing, yet a conifer, considerably planted in Washington, D. C., as a street tree. Grows 60 to 80 feet.			
10-12 inch x Once Transplanted—Bedded Stock.....	12.00

JUNIPERUS CANADENSIS

J. Communis (J. Communis Depressa)

The well-known, valuable, many-stemmed Dwarf Juniper. Rarely exceeds 2 feet in height, good form of Juniper for ground cover. It is at home on sandy or gravelly hill sides fully exposed to the sun, where single plants often reach 15 feet or more in diameter. Is sometimes catalogued as Juniperus Communis which is erroneous. The name Juniperus Communis Depressa is also applied, which is a synonym. Grows native in various sections of the country, but we obtain our seed from Northern Wisconsin, which is the superior type.

Variety	10	100	1000
6-8 inch o 2 yr. From Seedling Beds.....	\$.....	\$ 7.50	\$65.00
*1-1½ feet xx Twice Transplanted—From Field Rows, B&B	8.50	75.00

Variety	10	100	1000
Juniperus Canadensis Aurea (J. Communis Depressa Aurea) The aurea type is the golden form, similar to the green type except in color. Our plants are reproduced from a carefully selected strain of plants of extra bright golden color, compact growth and of symmetrical form.			
6-8 inch x Once Transplanted—Bedded Stock.....	\$ 4.00	\$30.00	\$.....
Juniperus Chinensis (Chinese Juniper) Very hardy and ornamental. Pyramidal or columnar in outline, with foliage of pleasing grayish-green color. Possesses wonderful adaptability to extremes of temperature and kinds of soils. Fine for Atlantic, Southern and Pacific Coast States.			
6-8 inch o 2 yr. From Seedling Beds.....	10.00	90.00
Juniperus Chinensis Pfitzeriana (Pfitzer's Juniper) Originated some years ago in Pfitzer's Nursery, near Berlin, Germany. Introduced by Ludwig Spaeth into general cultivation, from whom we obtained our original plants for propagating. A wide, plumose and graceful Evergreen of healthy blue-green foliage. Branches grow horizontal from the stem. Height, 6 to 10 feet. Our plants are transplanted and extra well rooted, fully hardened up with heavy tops. Much superior to light, spindly plants directly out of pots or sand flats.			
8-10 inch x Once Transplanted—Bedded Stock.....	3.50	25.00	225.00
10-12 " x Once Transplanted—Bedded Stock.....	5.00	35.00	300.00
Juniperus Chinensis Sargentii First collected by Professor Sargent in Japan in the autumn of 1892. This Juniper forms a low dense mat of wide-spreading branches covered with small dark green, scale-like leaves, mixed with pointed ones. In the Arboretum it is now the handsomest of the prostrate Junipers. Free from attack of insects and fungus diseases.			
10-12 inch xx Twice Transplanted—From Field Rows.....	9.00
Juniperus Chinensis Stricta (Greek Juniper) A variation from the type having a more tapering form, growing broader at the base. Foliage extremely glaucous. A good compact grower of medium height.			
8-10 inch x Once Transplanted—Bedded Stock.....	4.00	30.00
Juniperus Communis (English Juniper) Good upright grower, narrow, pyramidal form, light green foliage. Very popular.			
6-8 inch o 2 yr. From Seedling Beds.....	5.50	45.00
10-12 " x Once Transplanted—Bedded Stock.....	20.00
Juniperus Communis Depressa (See Juniperus Canadensis)			
Juniperus Communis Depressa Aurea (See Juniperus Canadensis Aurea)			
Juniperus Communis Hibernica (Irish Juniper) Very formal in outline and invaluable in Italian gardens or where architectural features are to be strongly emphasized. Foliage glaucous green. Not hardy in the extreme north.			
8-10 inch x Once Transplanted—Bedded Stock.....	15.00	140.00
5 of same variety and size at 10 rate; 50 at 100 rate; 500 at 1,000 rate.			
Each x indicates one transplanting.			
*Indicates will be dug with small earth ball and burlapped at price quoted.			

Variety		10	100	1000
Picea Alba (White Spruce)				
Described by Bailey, the eminent horticulturist, as "A native of the Northern Parts of America." Derives the name White Spruce due to its light, frosty green foliage, slightly tinged with blue. Thrives to the best advantage in the colder climates, north of Philadelphia or St. Louis. Although native throughout a wide range, the best types prevail throughout Northern Wisconsin, from where our seed is gathered from carefully selected grounds.				
4-6	inch o	2 yr. From Seedling Beds.....	\$....	\$ 4.50

12-18	" xx	" " " " " "	3.00	25.00
18-24	" xx	" " " " " "	4.00	35.00

Picea Canadensis (Black Hill Spruce)

Some what similar and closely related to White Spruce, but much more symmetrical, compact and bushy. Hardest of all Spruces. A native of the Black Hills of South Dakota and first introduced into commercial culture by Mr. D. Hill many years ago, since which time it has been fully tested in all parts of the country and found satisfactory. Foliage varies from green to bluish tint.

6-8	inch x	Once Transplanted—Bedded	Stock.....	9.00	80.00
8-10	“ xx	Twice Transplanted—From	Field Rows.....	3.50	30.00

Picea Engelmanni (Engelman Spruce)

One of the natives of the Rocky Mountains of Colorado. Resembles *Picea Alba* more than it does its near neighbor *Picea Pungens*, being of finer foliage and not such stiff branches as the latter.

6-8	inch	x	3 yr. From Seedling Beds.....	5.00	35.00

NORWAY SPRUCE (*Picea Excelsa*)

We are growers on the very largest scale of this popular fast growing Evergreen. Seedlings are produced in million lots and our annual transplantings now exceed over 500,000 plants every year. Chiefly valuable for screen and farm windbreak planting in the standard grades of twice transplants 10-12 inch, 12-18 inch, 18-24 inch and 2-3 feet. Car-load lots a specialty. It is also rapidly becoming popular for Xmas trees. As the Norway Spruce prevails over a wide range of territory in Europe, there are naturally many sources from which to obtain seed. Our careful experiments and close study of this situation for many years has proven conclusively that seed from French and German sources are unreliable for U. S. A. conditions. The French and German seed is easily obtainable and low in price, usually from 75c to \$1.00 per pound, but the really superior type of Norway Spruce exactly suited to U. S. A. conditions come from high elevations in the Swiss Alps and is always scarce and high in price, usually costing from \$4.00 to \$6.00 per pound. The exclusive use of this seed by us insures a really superior type of Norway Spruce exactly suited to U. S. A. conditions.

Variety	10	100	1000
Picea Pungens (Colorado Blue Spruce)			
A leading specialty with us. The stock offered below is nursery run, containing both blue and green trees. Our careful collection of seed from the bluest trees insures an unusual high percentage of blue trees. Many authorities agree that the selected seedling trees (compared to grafted trees) are more satisfactory, and eventually make much finer specimens. We obtain our seed from the Colorado Rockies the blue forms being glistening silvery blue in color.			

	the blue forms being ginseng severely blue in color.

Pinus Austriaca (Austrian Pine)

It is sometimes called Black Pine. Has rich glossy dark foliage. Well adapted for planting in cities, as it is highly resistant to smoke. Its native home is in the lower provinces of Austria and also the northern half of the Balkan Peninsula. A fast growing, dense tree of wonderful adaptability.

4-6	inch o	2 yr. From Seedling Beds.....	4.00	30.00

Pinus Banksiana (Jack Pine)

Fast growing pine well adapted to rough gravelly and sandy locations. Not particularly recommended for ornamental use, but largely for planting on dry sandy soils and hot climates such as certain sections of Nebraska, Kansas and the Dakotas. Grows and thrives on barren soils where other trees could not live.

AMERICAN ARBOR VITAE (White Cedar)

(Thuya Occidentalis)

Being the leading and popular Evergreen hedge plant, we grow this variety in large quantities and can furnish the twice transplanted sizes in car load lots. This species is also used as the understock for grafting all the different varieties of Thuya. For this purpose the heavier grades of seedlings or the once transplanted size is mainly used. Our annual culture of seedlings reaches several hundred thousand. Growing over such a wide range in its native growths, some trees are open growing and undesirable, but we are careful to obtain our seed from Northern Wisconsin, producing stock of absolute hardiness, good green color and compact habit of growth.

Thuya Occidentalis Compacta (Parson's Compacta Arbor Vitae)

There is a considerable mixture in this variety in nurseries throughout the country, but we continue to confine our propagation to the true Parson's form originated by Parsons. It is of slow growth, broad and compact and very hardy, of charming oval form.

6-8 inch x Once Transplanted—Bedded Stock.....	\$.....	\$15.00	\$140.00
--	---------	---------	----------

Thuya Occidentalis Conica Densa

Very dark green, narrow pyramid, 3 feet tall, 12 inches wide at maturity. Extra good for mixed group planting, where small size at maturity is a factor.

8-10 inch x Once Transplanted—Bedded Stock.....	2.50	20.00
---	------	-------	-------

Thuya Occidentalis Douglassi Pyramidalis (Douglas Pyramidalis Arbor Vitae)

A comparatively new variety, chiefly valuable on account of its crested foliage, deep dark green in color. Reaches a height of 12 to 15 feet.

6-8 inch x Once Transplanted—Bedded Stock.....	20.00
--	-------	-------

Thuya Occidentalis Ellwangeriana (Tom Thumb Arbor Vitae)

A low, broad pyramid, with the slender branches clothed with two kinds of foliage, juvenile and adult. A very interesting and valuable variety, being an intermediate form between the variety *Ericoides* and the type.

6-8 inch x Once Transplanted—Bedded Stock.....	20.00
--	-------	-------

Thuya Occidentalis Globosa Nova

A valuable new variety fully tested. Round bushy and compact. Good green color, very hardy. On account of its many new qualities, is bound to supersede many of the so-called globosa forms.

6-8 inch x Once Transplanted—Bedded Stock.....	22.50
--	-------	-------

Thuya Occidentalis Hoveyi (Hovey's Arbor Vitae)

A semi-dwarf, compact grower. Foliage dark green. Our stock is guaranteed true strain, which we have been growing for a great many years. Very hardy.

6-8 inch x Once Transplanted—Bedded Stock.....	25.00
--	-------	-------

10-12 inch xx Twice Transplanted—From Field Rows.....	5.00	40.00
---	------	-------	-------

Thuya Occidentalis Little Gem

Compact globular, dark green foliage. Very dwarf habit. Choice and rare.

6-8 inch x Once Transplanted—Bedded Stock.....	3.00	25.00
--	------	-------	-------

Thuya Plicata Pyramidalis

A dense pyramidal grower. Branchlet systems rigid, taking an erect and parallel position like those of *Thuya Orientalis*.

6-8 inch x Once Transplanted—Bedded Stock.....	3.50	30.00
--	------	-------	-------

Hill's Pyramidal Arbor Vitae (Thuya Occidentalis Pyramidalis)

Unfortunately many inferior types are on the market. Our carefully selected strain which we have improved through years of careful selection and propagation, is of noteworthy value, being the genuine narrow pyramidal type. It is an especially hardy, vigorous grower, forming a compact, narrow column of dense, green foliage.

6-8 inch x Once Transplanted—Bedded Stock.....	17.50	165.00
--	-------	--------

10-12 inch xx Twice Transplanted—From Field Rows.....	4.00	35.00
---	------	-------	-------

Thuya Occidentalis Rosenthalii—(Rosenthals Arbor Vitae)

A broad, symmetrical pyramid. Rich dark green. Medium grower.

6-8 inch x Once Transplanted—Bedded Stock.....	3.25	27.50
--	------	-------	-------

Thuya Occidentalis Spicata Alba (Hill's White Tipped Arbor Vitae)

Tips of young shoots creamy white. Very desirable.

6-8 inch x Once Transplanted—Bedded Stock.....	27.50
--	-------	-------

Thuya Occidentalis Umbraclifera

Of smaller and denser habit than the type, branchlets slenderer, with yellowish foliage, bronzy in winter.

6-8 inch x Once Transplanted—Bedded Stock.....	3.00	25.00
--	------	-------	-------

Thuya Occidentalis Vervaeana (Vervae's Arbor Vitae)

Light golden. Natural pyramidal habit, compact in outline. Attains great beauty as the tree develops.

6-8 inch x Once Transplanted—Bedded Stock.....	3.00	25.00
--	------	-------	-------

Thuya Occidentalis Wareana Siberica (Siberian Arbor Vitae)

This well known variety is well worthy of its wide popularity, combining as it does excessive hardiness, regular conical outline, and a peculiar dark green and remarkably dense foliage. Very compact grower.

6-8 inch x Once Transplanted—Bedded Stock.....	20.00
--	-------	-------

12-18 " xx Twice Transplanted—From Field Rows.....	6.00	50.00
--	------	-------	-------

Thuya Occidentalis Woodwardi (Woodward's Globe Arbor Vitae)

Without doubt one of the best globe forms on the list. Originated and introduced by Mr. Jacob Manning, Proprietor of the Reading Nurseries, Reading, Massachusetts, and named after his son, J. Woodward Manning. A few plants presented by the introducer shortly before his death to D. Hill, forms the basis of our stock. Therefore, we can justly say that our stock is the true strain.

o—Indicates Never Transplanted. Suitable for Bedding Out.
Each x indicates one Transplanting.

Once Transplanted Evergreens

For Lining or Bedding Out.

The plants offered in this department, as once transplanted are suitable in most cases for lining out directly into open field rows. This stock has been grown under shade and under water. They are well-rooted, and are well-balanced plants. In the case of several items, such as Hemlocks, Concolor Fir, Yews and perhaps one or two other varieties, we would recommend that they be replanted in beds, rather than be exposed to conditions in the open field row. This is stock that will quickly make money for you.

Evergreen Seedlings

Suitable for Bedding Out. Strong, Thrifty, Well Graded Stock.

The propagation of young Evergreens has been one of our specialties for a great many years, special attention being given to selection of the best strains and truest types. Our soil and climate is especially adapted to their culture. Great care is exercised in selection so that only hardy, dependable types are produced. We recommend bedding out young Evergreens where they can be shaded and watered for a year or two before planting out in open field rows. Plant the trees about two inches apart in the rows and place the rows about four inches apart, so the soil can be kept loose with a hand weeder.

Evergreen Vines and Ground Covers

Variety	Size Inch	100	1000
Evonymus Radicans Acutus.....(1 Trans. x)	12-15	\$9.00	\$80.00
Distinguished on account of its sharp pointed leaves.			
A good Evergreen Vine. Very attractive. Our stock is extra fine.			
Gardenia Radicans (Dwarf Jasmine), 2½ inch Pots 1 yr.....		20.00
Evergreen. Beautiful light colored pinnate foliage, very thrifty. Desirable for borders, beds and porch boxes. Can be trained as shrub or climber. The star-shaped, waxy-white, fragrant flowers produced in abundance nearly all the year.			
Pachysandra Terminalis (Japanese Spurge).....(1 Trans. x)	4-6	6.00	50.00
" " " "	6-8	7.00	60.00

A splendid Evergreen ground cover with thick glossy foliage, forming a dense mat, making low growing cover plant, excellent for edging. Does well in dense shade. Hardy.

Each x indicates one Transplanting

New Hill's Silver Juniper

(Juniperus Scopulorum)

A comparatively new introduction from the Rocky mountains by D. Hill, which we have during the past few years thoroughly tested in various sections of the country and found entirely satisfactory. It is absolutely hardy in the North and also well adapted to Southern conditions.

Many testimonials from leading firms and individuals confirm its worth. It is a beautiful, symmetrical, narrow pyramidal Juniper with the silvery blue color of the Blue Spruce; good grower and can be propagated from seed or rooted cuttings.

It has one single stem, in contrast to some varieties of Junipers with several stems. This makes it safe from heavy snow and wind. The inner foliage does not turn brown, but remains a good, healthy color throughout the year.

Two additional distinct types are also being propagated and will be ready for distribution soon. Secure a stock of these trees now and learn more about the coming Silver Juniper.

Hill's Silver Juniper
(Juniperus Scopulorum)

Hill's Specimen Evergreens for Landscape Work

Specimen Evergreen Showing Hill Method of Ball and Burlap

Hill's Specimen Evergreens are all perfect specimens, having good roots and symmetrical tops, owing to frequent transplanting, constant cultivation and root-pruning, shearing and staking. Hill's Specimen Evergreens will please your most exacting customers.

In comparing our prices with those of other growers, remember that height alone cannot by any means establish values. An Evergreen tree grown close and crowded in the row may be exactly the same height as a Hill Specimen Evergreen, but will not be as heavy, compact, symmetrical, or have as good roots. Please note that Hill's Specimen Evergreens are never dug without earth ball and are grown in separate blocks entirely apart from other trees.

In some localities it is impossible to dig Evergreens with a solid ball of earth on account of loose, sandy, rocky soil, which will not adhere to the roots. Our rich black prairie loam contains just enough clay to give it good texture and when interwoven with masses of fine, fibrous feeding roots, easily holds in place. As additional protection, each earth ball is securely tied in burlap.

Constant transplanting and root-pruning gives Hill's Specimen Evergreens masses of fine, fibrous feeding roots, which together with constant shearing, results in heavy, bushy, symmetrical tops and insures the success of Hill's stock in the hands of the planter.

Hill Specimen Evergreens are always worth the price you pay for them; will never disappoint you and will be found the most economical in the long run.

Each	10
------	----

Variety
Abies Balsamea (Balsam Fir)

The characteristic odor of the Northern woods is chiefly, if not solely, due to this Fir. The foliage is very fragrant, young growths often being used for making the favorite "Balsam Pillows." Makes a handsome lawn specimen. Our stock is grown from a carefully selected strain of seed gathered in certain sections in Northern Canada, insuring hardiness and trueness to type.

1½-2 feet xxx Heavy Specimens—Solid Balls—B&B.....	\$ 1.25	\$ 9.00
--	---------	---------

Abies Concolor (Concolor Fir)

We are careful to obtain our seed supply from Northern Colorado, producing trees of absolute hardiness with striking foliage varying in color from light green to deep soft blue with medium short needles. The strain of Concolor from New Mexico, where seed is cheap and always abundant is much inferior, inclined to winter kill and is of rather straggly, open appearance. Long-lived, growing 60 to 80 feet high.

2-3 feet xxx	Heavy Specimens—Solid Balls—B&B.....	3.25	30.00
3-4 " xxx	" " " "	5.25	50.00

Abies Douglassi (Douglas Fir)

Our plants are the type from Northern Colorado, the seed being collected in deep gorges of high altitudes where the blue and silvery foliage is characteristic, being compact and symmetrical in growth, with rather short needles, in contrast to Southern Colorado and New Mexico type, which are of doubtful hardness, irregular and open growing. The tree was originally discovered by Archibald Menzies, 1792, and rediscovered by David Douglas, the eminent Scotch explorer in 1827, and introduced by him in the following year. It was shortly after named for him to commemorate his memory. A tree that is widely known and appreciated in both Europe and America.

Abies Tsuga Canadensis (Hemlock)

The value of our strain of Hemlocks is based on seed selection from Northern sources only, insuring hardiness and free, graceful upright growth. In the past, European grown plants were mainly propagated from Southern collected seeds (from the Carolinas, Tennessee, etc.), because the seed was cheap and easily obtainable. In addition to producing a rather inferior type of tree, when brought to colder climates, it always winter scalded, turned a ragged brown, or killed outright. Our Hemlocks are warranted the genuine Northern strain, and will be found superior to other offerings on the market.

Juniperus Canadensis (J. Communis Depressa)

The well known, valuable, many-stemmed Dwarf Juniper. Rarely exceeds 2 feet in height, good form of Juniper for ground cover. It is at home on sandy or gravelly hillsides fully exposed to the sun, where single plants often reach 15 feet or more in diameter. Is sometimes catalogued as *Juniperus Communis* which is erroneous. The name *Juniperus Communis Depressa* is also applied, which is a synonym. Grows native in various sections of the country, but we obtain our seed from Northern Wisconsin, which is the superior type.

Juniperus Virginalis Globosa Aurea		
Same as above with bright golden foliage.		
15x15 inch xxx Heavy Specimens—Solid Balls—B&B.....	2.50	22.50
Juniperus Virginiana (Red Cedar)		
Pyramidal habit, dark green to bluish foliage. Our stock is the hardy Northern strain. One of the most useful and characteristic trees of our American landscapes, rivaling the Italian Cypress in beauty. Adapted for planting in all sections of the country. The propagation of this valuable Conifer has been a specialty with us for many years and we exercise great care in the selection of our strain of seed.		
2-3 feet xxx Heavy Specimens—Solid Balls—B&B.....	1.75	15.00
3-4 " xxx " " " " "	2.25	17.50
4-5 " xxx " " " " "	3.25	27.50
5-6 " xxx " " " " "	4.75	40.00
Juniperus Virginiana Counarti (Counarti Juniper)		
Handsome dark green variety, with foliage of deep rich green. Upright grower, reaching 15 to 20 feet. Our plants are propagated by grafting selected scions of Juniperus Virginiana Counarti on native Juniperus Virginiana root, insuring stock true to name and absolutely hardy.		
4-5 feet xxx Heavy Specimens—Solid Balls—B&B.....	5.25	47.50
Juniperus Virginiana Elegans Lee (Lee's Golden Juniper)		
A graceful, upright variety with slightly drooping tendencies, reaching about 10 to 15 feet. Each season the new growth is a rich creamy golden color eventually changing to green. This is one of the most beautiful Junipers. Absolutely hardy, and a good grower.		
2-3 feet xxx Heavy Specimens—Solid Balls—B&B.....	3.25	30.00
Juniperus Virginiana Glaucia (Silver Cedar)		
In this variety, the whole of young growths are of almost silvery whiteness, which changes to pal glaucous green in winter. The Juniper Glaucia is foremost among the interesting group of Junipers that have been developed from the Juniperus Virginiana (Red Cedar). We constantly strive to improve our strain by careful selection and reproduce only the best types, most true to form, color, compactness and habits of growth. In grafting this tree, we are careful to use for understocks only the dependable Red Cedar, insuring hardness and longevity.		
5-6 feet xxxx Heavy Specimens—Solid Balls.....	6.50	57.50
Juniperus Virginiana Kosteri		
Semi-dwarf habit, naturally spreading, foliage dense. Good strong grower. Very hardy. Marine blue in color.		
Forms a wide open bush with erect and spreading, gracefully arching stems from two to three feet tall. This is an unusually handsome plant which will prove useful for the margins of beds of taller growing conifers. This variety probably originated in a European nursery.		
*1-1½ feet xx Twice Transplanted—From Field Rows—B&B.....	1.50	12.50
Juniperus Virginiana Pyramidalis		
A variety of distinct merit noticed by A. H. Hill on a visit to the Johannes Von Ehren nurseries, near Berlin, Germany, in 1908, and introduced into the United States the following Spring when we imported all the available stock, 100 trees, 3 feet, which forms the basis of our propagating stock. It is absolutely hardy and a good grower, being narrow, very pyramidal with good dark green foliage.		
2-3 feet xxx Heavy Specimens—Solid Balls—B&B.....	2.75	25.00
Juniperus Virginiana Schotti (Schott Juniper)		
A valuable dense growing pyramidal form, with rather light green foliage, very hardy, grows 15 to 20 feet high. One of the best of the upright varieties of Juniper, retaining its color all winter.		
1½-2 feet xx Twice Transplanted—From Field Rows, B&B (100-\$90) .	1.25	10.00

Variety

Each

10

Hill's Silver Juniper (Juniperus Scopulorum)

Beautiful silvery blue color. Narrow, compact, and symmetrical. It has one single stem, in contrast to some varieties of Junipers with several stems. This makes it safe from heavy snows and winds. The inner foliage does not turn brown.

*1-1½ feetxx Twice Transplanted—From Field Rows—B&B..... \$1.00 \$7.50

Picea Alba (White Spruce)

Derives the name White Spruce due to its light frosty green foliage, slightly tinged with blue. Thrives to the best advantage in the colder climates, north of Philadelphia or St. Louis. Although native throughout a wide range, the best types prevail throughout Northern Wisconsin, from where our seed is gathered from carefully selected grounds.

3-4 feet xxx Heavy Specimens—Solid Balls—B&B..... 2.50 20.00

Picea Canadensis (Black Hill Spruce)

Somewhat similar and closely related to White Spruce, but much more symmetrical, compact and bushy. Hardest of all Spruces. A native of the Black Hills of South Dakota and first introduced into commercial culture by Mr. D. Hill many years ago, since which time it has been fully tested in all parts of the country and found satisfactory. Foliage varies from green to bluish tint. Found entirely satisfactory north of St. Louis and Philadelphia.

3-4 " xxx " " " " " " 3.50 30.00

4-5 " xxx " " " " " " " 4.25 37.50

Picea Pungens Glauca (Colorado Blue Spruce)

These trees are of extra choice, blue color. Grown from selected seed from the bluest trees in the Rocky Mountains. A specialty with us for many years.

2-3 feet xxxx Heavy Specimens—Solid Balls—B&B..... 4.50 40.00

Picea Pungens Kosteriana (Koster's Blue Spruce)

Although good plants, in small sizes are scarce, we have some extra fine stock that have been staked and very carefully grown for individual specimen planting.

2-3 feet xxx Heavy Specimens—Solid Balls—B&B..... 7.50 70.00

Pinus Austriaca (Austrian Pine)

Is sometimes called Black Pine. Has rich, glossy, dark green foliage. Well adapted for planting in Cities, as it is highly resistant to smoke. Its native home is in the lower provinces of Austria and also to the Northern half of the Balkan Peninsula. A fast growing, dense tree of wonderful adaptability. For years we have secured our seeds from original sources in Austria, but since the war are now using carefully selected home grown seed which has proven as satisfactory or even more so than the imported seed.

2-3 feet xxx Heavy Specimens—Solid Balls—B&B..... 1.50 12.50

3-4 " xxx " " " " " " 2.75 22.50

Pinus Cembra (Swiss Stone Pine)

One of the most interesting of pines producing edible seeds or nuts. Its growth is slow, rarely exceeding one foot each season. It requires but little room and is always well furnished with foliage. Formerly grew over a wide area of both Europe and Asia. Pinus Cembra was cultivated by the Duke of Argyll in 1746 and is thence supposed to have been introduced by him.

1½-2 " xxx " " " " " " 2.00 17.50

Pinus Flexilis (Limber Pine)

A tree of medium size with stout horizontal branches, forming a narrow pyramidal head. Grows naturally from Alberta to California, and New Mexico. Color bluish white to deep green. A fine hardy ornamented tree.

2-3 feet xxx Heavy Specimens—Solid Balls—B&B..... 1.75 15.00

3-4 " xxx " " " " " " 2.50 20.00

Hill's Dwarf Mountain Pine (Pinus Mugho Compacta)

Our Pinus Mugho is the genuine true dwarf type, many stemmed, compact, with good dark green color, which it retains throughout the winter. Many inferior forms of this variety offered as Pinus Mugho, are in the market, some of which are loose open growers and some of upright, irregular habit. The strain we offer is the true dwarf, compact type, and the seed (from the Riesenbirge Range in Silesia), is obtainable only at great expense in small quantity, because of its scarcity. When obtainable, the true seed costs as high as \$15.00 per pound, in contrast to \$1.50 per pound for the common form. Rarely grows over 3 to 6 feet high.

1-1½ feet xxx Heavy Specimens—Solid Balls—B&B..... 1.75 15.00

1½-2 " xxx " " " " " " 2.25 20.00

Pinus Ponderosa (Ponderosa Pine)

Sometimes called Bull Pine or Western Yellow Pine. The most widely distributed Evergreen of North America. The type found growing in the Black Hills of South Dakota, from where we obtain our seed, is a much superior type, being a hardy, free, upright grower. Very deep rooted and drought resistant. It is a handsome, ornamental tree, with interesting long needles.

2-3 feet xxx Heavy Specimens—Solid Balls—B&B..... 1.50 12.50

3-4 " xxx " " " " " " 2.50 20.00

Pinus Resinosa (Red or Norway Pine)

Native of the Northern part of the United States, reaching its greatest development in Northern Wisconsin. One of the most ornamental Pines for the North.

3-4 feet xxx Heavy Specimens—Solid Balls—B&B..... 2.25 20.00

4-5 " xxx " " " " " " 2.75 22.50

5 of the same variety and size at the 10 rate.

Variety					Each	10
Thuya Occidentalis (American Arbor Vitae)						
Being the leading and popular Evergreen hedge plant, we grow this variety in large quantities and can furnish twice transplanted sizes in car load lots. This species is also used as an understock for grafting all the different varieties of Thuya. For this purpose the heavier grades of seedlings or the once transplanted size is mainly used. Our annual culture of seedlings reaches several hundred thousand. Growing over such a wide range in its native growths, some trees are open growing and undesirable, but we are careful to obtain our seed from Northern Wisconsin, producing stock of absolute hardiness, good green color and compact habit of growth.

Thuya Occidentalis (Sheared Globes)

These plants are neat clipped specimens of American Arbor Vitae.

12x12 inch xxx	Heavy Specimens—Solid Balls—B&B.....	1.50	12.50
----------------	--------------------------------------	------	-------

Thuya Occidentalis Compacta (Parson's Compacta Arbor Vitae)

There is a considerable mixture in this variety in nurseries throughout the country, but we continue to confine our propagation to the true Parsons' form originated by Parsons. It is of slow growth, broad and compact and very hardy, of charming oval form.

12x12 inch xxx	Heavy Specimens—Solid Balls—B&B.....	1.50	12.50
15x15 “ xxx	“ “ “ “ “ “	1.75	15.00

Thuya Occidentalis Douglassi Pyramidalis (Douglas Pyramidal Arbor Vitae)

A comparatively new variety, chiefly valuable on account of its crested foliage, deep dark green in color. Reaches a height of 12 to 15 feet.

2-3	feet xxx	Heavy Specimens—Solid Balls—B&B.....	2.00	17.50
-----	----------	--------------------------------------	------	-------

Thuya Occidentalis Lutea (Peabody's Golden Arbor Vitae)

A distinct golden type, which we have been able to improve considerably by closer selection, propagating only the brightest golden color, producing plants of exceptional merit. Rather slender in habit, reaching 12 to 15 feet high with a diameter of 2 to 2½ feet.

1-1½ feet xxx	Heavy Specimens—Solid Balls—B&B.....	1.50	12.50
1½-2 “ xxx	“ “ “ “ “ “	1.75	15.00

Hill's Pyramidal Arbor Vitae (Thuya Occidentalis Pyramidalis)

Unfortunately many inferior types are on the market. Our carefully selected strain which we have improved through years of careful selection and propagation, is of noteworthy value, being the genuine narrow, pyramidal type. It is an especially hardy, vigorous grower, forming a compact, narrow column of dense, dark green foliage.

Thuya Occidentalis Rosenthalli

An excellent compact pyramidal grower. Good winter color. Very hardy.

1-1½ feet xxx	Heavy Specimens—Solid Balls—B&B.....	1.75	15.00
---------------	--------------------------------------	------	-------

Thuya Occidentalis Wareana Siberica (Siberian Arbor Vitae)

This well known variety is well worthy of its wide popularity, combining as it does excessive hardiness, regular conical outline, and a peculiar dark green and remarkably dense foliage. Very compact grower.

1-1½ feet xxx	Heavy Specimens—Solid Balls—B&B.....	1.75	15.00
1½-2 “ xxx	“ “ “ “ “ “	2.25	20.00

Thuya Occidentalis Woodwardi (Woodward's Globe Arbor Vitae)

Without doubt one of the best globe forms on the list. Originated and introduced by Mr. Jacob Manning, Proprietor of the Reading Nurseries, Reading, Massachusetts, and named after his son, J. Woodward Manning. A few plants presented by the introducer shortly before his death to D. Hill, forms the basis of our stock. Therefore, we can justly say that our stock is the true strain.

XMAS TREES

You can easily grow a patch of Xmas Trees to supply your local trade. Small seedlings or transplanted sizes of Norway Spruce rapidly grow into money, bringing in business at the dull season. Each year wild trees are getting scarcer and it will be only a few seasons until the cutting of wild trees will be prohibited. You can start selling in 3 or 4 years at 50c and \$1.00 each. Write for information.

The trees we offer are grown from seed collected right here in the city of Dundee from the true Northern type of straight stemmed, vase like specimens, that are growing entirely apart from any possible mixture with other types. It will pay you to grow trees of this kind. We are making some very attractive prices.

4-6 feet	Well branched	Transplanted	\$15.00	\$140.00
6-8 "	"	"	25.00	240.00

A black and white photograph of a large, dark, bushy plant with many small, light-colored flowers or fruits, growing out of a round, textured base. The plant has a dense, rounded canopy of small, light-colored flowers or fruits, giving it a very full appearance. The base is a round, textured object, possibly a piece of wood or a large, rounded flower bud, with some visible texture and a small, dark, triangular mark on its side. The entire plant is set against a plain, light background.

FIELD GROWN ROSES

The following complete assortment of Roses are all No. 1, carefully graded and tied in bundles of five. For Spring delivery. Note: H. P. indicates Hybrid Perpetual, H. T.) Hybrid Tea, (Poly.) Polyanthus, (Cl. T.) Climbing Tea, (H. Ch.) Hybrid China, (C. H. T.) Climbing Hybrid Tea, (H. W.) Hybrid Wichuriana, (T.) Tea, (Bour.) Bourbon.

Variety	No. 1	10	100
Black Prince (H. P.)	No. 1	\$3.75	\$32.50
Velvety crimson with shadings of purplish black. Upright, strong growth.			
Cecile Brunner (Poly)	No. 1	3.75	32.50
Dainty, tiny miniature roses of delicate bisque pink. Beautiful long pointed buds. Vigorous, low-spreading.			
Cl. Baby Rambler (Poly)	No. 1	3.75	32.50
An everblooming true Crimson Rambler. Foliage never mildews, always clean and bright.			
Cl. Captain Christy (H. T.)	No. 1	3.25	27.50
Large, full, double blossoms of most delicate pink, shading deeper in center.			
Cl. Caroline Testout (Cl. T.)	No. 1	3.75	32.50
Vigorous climber. Large cup-shaped blooms. Delicate pink.			
Cl. Helen Gould (Cl. T.)	No. 1	3.75	32.50
A perfect Helen Gould that is a strong climber.			
Cl. Wooton (Cl. T.)	No. 1	3.75	32.50
Good red climbers. Blooms large and full.			
Cl. Killarney (Cl. H. T.)	No. 1	3.75	32.50
Like Killarney except that it is a vigorous climber; deep shell-pink.			
Dorothy Perkins (H. W.)	No. 1	3.25	27.50
Clear shell-pink flowers, profusely borne in clusters; full and double, with crinkled petals.			
Etoile De Lyon (T.)	No. 1	3.75	32.50
Beautiful chrome-yellow. Pure golden center.			
Eugene Marlitt (Bour.)	No. 1	3.25	27.50
Flowers large, very double, a rich, bright crimson; fragrant.			
Cl. Gruss An Teplitz (H. Ch.)	No. 1	3.75	32.50
A vigorous climber. A perfect sheet of dazzling crimson when in bloom.			
Magna Charta (H. P.)	No. 1	3.25	27.50
Extra large, full flowers of unusual depth; bright rosy-pink in color.			
J. B. Clark (H. P.)	No. 1	3.25	27.50
Intense flaming scarlet. Well-formed cup-shaped.			
Gen. Jacqueminot (H. P.)	No. 1	3.25	27.50
Bright, shining crimson, very fragrant, free bloomer.			
Mad. Jules Grolez (H. T.)	No. 1	3.75	32.50
Bright, rich, rosy red blooms of splendid substance on good stiff stems. Spreading habit.			
Margaret Dickson (H. P.)	No. 1	3.25	27.50
White with delicate flesh center. Best of white perpetuals. Vigorous, upright.			
Maman Cochet (Pink) (T.)	No. 1	3.75	32.50
Rosy-pink, shadings of silvery-rose.			
Maman Cochet (White) (T.)	No. 1	3.75	32.50
Of same habits as Pink Cochet, best pearly-white.			
Paul Neyron (H. P.)	No. 1	3.75	32.50
Deep, rosy-pink, full, double blooms with spicy fragrance, borne on strong upright stems.			
Frau Karl Druschki (H. P.)	No. 1	3.75	32.50
One of the purest white roses known. Sometimes known as Snow Queen. Very large blooms.			
Radiance	No. 1	4.50	40.00
Pink, darker on the inner surface of the petals than on the margin.			
Reine Marie Henrietta (Cl. T.)	No.	3.75	32.50
Bright, cherry-red. Delicately scented. Vigorous climber and good bloomer.			
Wellesley (H. T.)	No. 1	3.00	27.50
Pink, outside of petals being very bright pink in color and reverse of silvery shadings. Upright.			
White American Beauty (H. P.)	No. 1	3.00	27.50

5 of same variety and size at 10 rates. 50 at 100 rate.

Typical Farm Evergreen Windbreak of Norway Spruce

To Nurserymen Handling Agents

Let your salesmen sell Evergreens. The demand is already created. Evergreen Windbreaks to the country trade—Evergreen Hedges to the town and city trade. Many leading nurserymen have pushed this line for years, your men will find them easy to sell.

Prices are reasonable, profits unusually good, and we have the stock all ready for you in one thousand or one hundred thousand lots. Solid car loads a specialty.

Write for complete information.

How to Reach Our Nursery

Visitors are always welcome. We are conveniently located only 42 miles northwest of Chicago.

When coming by the way of Chicago, you are directed to the C. & N. W. Depot on Madison Street, from where it is an interesting ride of one hour and thirty minutes direct to Dundee.

For an hourly service from Chicago, take the A., E. & C. Electric Line at Wells Street and Jackson Boulevard, direct to Elgin, transferring to the Dundee - Carpentersville car, getting off at Stop No. 4, from where it is but a two-minute walk direct to our office, which is located right on the nursery grounds.

Paved road from Chicago brings you direct to our Nursery.
